

Lift Console Storage Mechanism Hinges

Welcome to buy lift console storage mechanism hinges from LINKREST, we will offer you the best after-sale service and timely delivery. This lift console storage mechanism hinges has been modified to change the position of the power spring so that the storage box can be slowly closed. It is a 90 degree storage mechanism, which means that it is only suitable for small storage space and requires 90 degree or more storage space. It is usually suitable for console storage, arm storage, small footstool storage, candy storage, etc.

Product Description

Lift Storage Bed Mechanism Hinges

LINKREST is one of the outstanding **Lift Console Storage Mechanism Hinges** manufacturers and suppliers in China. We realized that sofa sleeper played more and more important roles in the furniture industry, but we will think very hard for continuing improvements such as: how to make seat as comfortable as stationary seat and how to make sleeper as comfortable as bedroom bed; How to save delivery cost both for mechanism and finished sleeper; How to operate simply for end users both manual and power versions; and how to meet all kind of stationary sofa designs ect. Our wide selection of high-quality and technically innovative folding and unfolding sofa bed mechanisms add value to leading upholstery brands both in domestic and international markets.

Lift Console Storage Mechanism Hinges Features:

This is 90 degrees storage mechanism, that means it only fits small storage place and the place where the storage needs to be 90 or more than 90 degrees.

Usually apply for console storage, arm storage, small ottoman storage, candy storage etc.

It means the length in open direction is short enough to close.

This hinge already made the improvement to change the power spring location so that the storage can close slowly.
